EKEZIE CHIEMELIE ISAAC

Full-Stack Engineer & Visual Designer

Abuja / Lagos, Nigeria | ekezie.chiemelie@gmail.com

ekezie-chiemelie.vercel.app | LinkedIn | GitHub

PROFILE

Full-stack engineer and visual designer building web applications, brand and packaging systems, and internal business tools. My work spans React and Next.js interfaces, PostgreSQL-backed applications, enterprise IT support, and print-ready artwork.

PROFESSIONAL EXPERIENCE

IT Analyst & Systems Specialist

Bakan Gizo Pharmacy & Stores Ltd | Abuja, Nigeria | April 2026 - Present

IT operations and business systems support for a multi-branch retail pharmacy.

- Built an internal Python issue-tracking and provisioning portal so staff could record hardware and software requests in one place and follow their progress.
- Deployed and supported Odoo ERP workflows for branch teams, connecting inventory operations with the central business system.
- Administered PHP point-of-sale systems, database access, and branch connectivity to support daily retail operations.

Frontend Developer Intern

Zorvyn FinTech Pvt. Ltd. | Remote | April 2026 - October 2026

Frontend development for financial tracking and portfolio dashboards.

- Translated Figma layouts into reusable React and TypeScript dashboard components for balances, transactions, and portfolio views.
- Refactored transaction tables with virtualized rendering to keep long histories usable without rendering every row at once.
- Connected shared Zustand state across dashboard views and checked responsive layouts and keyboard navigation.

Web Designer & Frontend Developer

Chuga Rex Limited | Lagos, Nigeria | March 2024 - August 2024

Brand design and storefront development for a retail accessories business.

- Created brand identity assets and desktop/mobile storefront layouts in Figma, then built the responsive WordPress/WooCommerce interface.
- Integrated Paystack inline checkout and payment webhooks so customers could pay within the storefront and orders could record payment confirmations.
- Configured Cloudflare caching and synchronized inventory between the warehouse stock records and online catalog.

PROFESSIONAL EXPERIENCE / CONTINUED

Freelance Full-Stack Developer & Design Consultant

Independent Practice | Remote / Client Sites | May 2022 - Present

Independent software development, cloud setup, and visual design for client projects.

- Built authenticated Next.js applications with PostgreSQL and Prisma, including the Indie CRM lead-management and conversation-memory workflows.
- Designed brand systems, packaging copy, and print-ready carton artwork, including the Dr Kayla soap and honey-mixture ranges.
- Implemented payment integrations and managed AWS application and asset infrastructure for client projects.

SELECTED WORK

Indie CRM SaaS Platform

A workspace-based CRM for independent operators: capture a lead, keep the conversation in context, plan a follow-up, and search past client conversations.

Public walkthrough and case study

IDS X Enc Security Console

Security monitoring interface demonstrating live file encryption, threat quarantine isolation, and real-time network logs.

Dr Kayla packaging systems

Designed coordinated carton systems for seven soap variants and five honey-mixture variants: visual hierarchy, variant colors, packaging copy, and print-ready dielines.
